Organizations urged MEPs to support the NGT trilogue agreement without delay: Euroseeds, COPA-COCEGA and other organizations called on members of the European Parliament’s ENVI Committee to endorse the provisional agreement on the Regulation on New Genomic Techniques, arguing that the compromise provides a balanced and science-based framework for plant breeding innovation. The organisations stressed that timely adoption of the legislation is essential to enable the development of more resilient and sustainable crop varieties, strengthen the competitiveness of the European agri-food sector and provide farmers with access to innovative breeding solutions, and warned that further delays could hinder investment and innovation in the EU plant breeding sector.

AGRI Committee presented the study on the role of the bioeconomy in agriculture: The European Parliament’s Committee on Agriculture and Rural Development organised a presentation of the study “The Bioeconomy in the Agriculture of the Future: Its Role in Promoting Farms’ Economic Sustainability” on June 2. The event examined how bioeconomy-related activities can contribute to farm income diversification, resource efficiency and rural development, while supporting the transition towards more sustainable agricultural systems. Discussions also addressed policy measures needed to strengthen the uptake of bio-based solutions and enhance the economic resilience and competitiveness of European farms.

Documents published in the Official Journal: The following documents were published in the Official Journal of the European Union:

- Commission Implementing Decision (EU) 2026/1185 of 2 June 2026 authorising the placing on the market of products containing, consisting of or produced from genetically modified soybean MON 94637 pursuant to Regulation (EC) No 1829/2003
- Common catalogue of varieties of agricultural plant species Supplement A 2026/5
- Common catalogue of varieties of vegetable species Supplement H 2026/5
