National news

Announcement regarding the list of products authorized for aerial spraying: The National Phytosanitary Authority informed that holders of plant protection products that technical files can be submitted in order to update the list of products authorized for application by aerial spraying. The technical dossier must include administrative documents, data on the risk assessment for human health, data on the risk assessment for the environment, as well as, where appropriate, information on the biological efficacy of the product at low volumes of water specific to aerial spraying application.

NPA at the “Rapeseed Day in Bărrăgan” event: The Director General of the National Phytosanitary Authority, Romeo Soldea, participated in the first edition of the “Rapeseed Day in Bărrăgan” event, organized on June 9, which brought together farmers, specialists, agribusiness companies and representatives of institutions with responsibilities in the agricultural field. During the meeting, the ANF director provided farmers with the latest news on the inspection of plant protection product application equipment, updating the legislation on the application of plant protection products with drones, and legislative news discussed at the European level, with an impact on agricultural activity.

European news

Analysis on generational change in agriculture: The AGRI Committee published a study on generational renewal in agriculture, examining young farmers and support measures in Finland, Spain, Luxembourg and Poland. The report highlights the continued decline in the number of young farmers across the EU and notes that young farmers generally manage larger and more specialised farms than older farmers. It concludes that CAP support, together with national measures improving access to land, finance and farm succession, remains essential to facilitate generational renewal and strengthen the long-term viability of the agricultural sector.

Eurostat report on agricultural prices in the EU in Q1 2026: Eurostat published data on agricultural price indices showing that the average price of agricultural output in the EU decreased by 2.9% in the first quarter of 2026 compared with the same period in 2025, continuing the downward trend observed at the end of 2025. The decline was mainly driven by lower prices for milk (-15.5%) and cereals (-11.7%), while fertiliser and soil improver prices increased by 6.6%. Romania was among the Member States recording higher agricultural input prices, with an increase of 5.0% year-on-year. The report concludes that agricultural output prices remained under pressure across most EU countries, while input prices were broadly stable, although certain production costs, particularly fertilisers, continued to rise.

Safety evaluation regarding Aspergillus: The European Food Safety Authority published the following documents:

- Safety evaluation of the food enzyme glucan 1,4- α -glucosidase from the non-genetically modified *Aspergillus niger* strain AE-GN
- Safety evaluation of a food enzyme containing oryzin and leucyl aminopeptidase activities and a heat-treated food enzyme containing only leucyl aminopeptidase activity from the non-genetically modified *Aspergillus* sp. strain FL 72-230

ENVI to vote on NGTs draft regulation: During a meeting to be held on June 15, the ENVI Committee will vote on the report regarding the proposal for a Regulation of the European Parliament and of the Council on plants obtained by certain new genomic techniques and their food and feed.
